Loctite	DESCRIPTION	LOXEAL COMPARABLE *	LOXEAL CLOSE MATCH **
		* COMPARABLE: 99% match	** CLOSE MATCH:Loxeal product range best fitting
90C			70-90
1250 A/B			33-47 A/B
E 120 HP			3638
207		59-20 Trasp.	
221	Threadlocking - Low strength, low viscosity, small threads Threadlocker	32-18	
222	Threadlocking - Low strength, general purpose Threadlocker	24-18	
225		26-18	
232			53-11
240			52-03
2400	Threadlocking - Medium Strength Threadlocker "white" Material Safety Data Sheet	55-02	
241	Threadlocking - Medium strength, low viscosity, small threads threadlocker	52-03	
242	Threadlocking - Medium strength, medium viscosity, general purpose threadlocker	54-03	
243	Threadlocking - Suitable for all metal threaded assemblies.	55-03	
245	Threadlocking - Medium strength, medium viscosity, large threads threadlocker	56-03	
260			55-04
262	Threadlocking - High/Med Strength Torque Tension Threadlocker	55-04	
263			83-55
266	Threadlocking - High/Med Strength Torque Tension Threadlocker		86-72/86-86
270	Threadlocking - High Strength Threadlocker	83-54	
2700	Threadlocking - High Strength Threadlocker "white" Material Safety Data Sheet	83-52	
2701	Threadlocking - High strength, especially for chromated surfaces Threadlocker	83-03/83-50	
271	Threadlocking - High strength, low viscosity Threadlocker	83-55	
272	Threadlocking - High temperature, high strength Threadlocker	86-72	
274		52-03	
275	Threadlocking - High strength, high viscosity, large threads Threadlocker	86-54	
276	Threadlocking - High strength, especially for nickel surfaces Threadlocker		83-50T
2760			83-50 HT/85-05
277	Threadlocking - High strength, high viscosity, large threads Threadlocker	86-53	86-58
278			85-86/85-02
290	Threadlocking - Penetrating Threadlocking Compound	70-14	
3011	Light Cure Adhesive - Fast surface cure, ISO 10993 certified	30-27	
3021			30-27 HV
3103	Light Cure Adhesive - For stress sensitive plastics		UV 30-11HH
319	Structural bonding - glass-metal bonder		3439 + 20
324			
326	Structural bonding - Magnet bonder		3459T+att20
330	Structural bonding - General purpose	33-00	
3301	UV PLASTIC		UV 30-12
3421	Structural bonding - 2K Epoxy, general purpose, long open time	36-10	
3422		31-42	
3423	Structural bonding - 2K Epoxy, multiple purpose, excellent for metal, good humidity resistance	36-10	
3425	Structural bonding - 2K Epoxy, multiple purpose bonder, excellent for bonding metals, for large surfaces		31-10/3638.3
3430	Structural bonding - 2K Epoxy, multiple purpose bonder, fast, ultra clear	31-40	
3491		30-26 UV	
3494	Light Cure Adhesive - High transparency, low yellowing		
350	Light Cure Adhesive - High humidity and chemical resistance	30-22	
352			UV AE 19 HT
380	Instant Adhesive: also known as Black Max		77
3801			31-42

401	Instant Adhesive - Universal, low viscosity	43S	
403	Instant Adhesive - Low bloom, low odour, medium viscosity	67	
406	Instant Adhesive - Low viscosity, plastics & rubber	32/41	
4062	Instant Adhesive - Plastics & rubber, capillary	41	
407	Instant Adhesive - High temperature, low viscosity	54	
408	Instant Adhesive - Low bloom, low odour, capillary	61	
409	Instant Adhesive - General purpose, gel	47	
410	Instant Adhesive - Toughened, black, high viscosity	29	
411	Instant Adhesive - Peel/Shock resistant	75	
412	Instant Adhesive - CA plastiified for temporary bonding		20
414	Instant Adhesive - General purpose, low viscosity	43	
415	Instant Adhesive - Metals, medium viscosity	17	
416	Instant Adhesive - General purpose, medium viscosity	27	
420	Instant Adhesive - General purpose, capillary	20	
4205	Instant Adhesive - General purpose, gel high temperature		58
4210			77
4211			77
422			27,75
424	Instant Adhesive - Plastics & rubber, low viscosity	43S	
430			14
431	Instant Adhesive - Universal, medium viscosity	45	
435	Instant Adhesive - Toughened, clear	73	
438	Instant Adhesive - Toughened, black, fast	74	
454	Instant Adhesive - Universal, gel	47	
460	Instant Adhesive - Low bloom, low odour, low viscosity	63	
480	Instant Adhesive - Toughened, black, fast	29	
4850	Instant Adhesive - Flexible, bendable, low viscosity		73
4860			37/75
493	Instant Adhesive - Metals, capillary		
495	Instant Adhesive - General purpose, low viscosity	23	
496	Instant Adhesive - Metals, low viscosity	14	
503			T2
504			28-15
5060			59-20
5061		T2	
510	Gasketing - For machined, rigid metal flanges - high temperature resistance	59-10	
5101		59-10	
511	Thread Sealant - For metal, low strength, general purpose thread sealant	58-10	
5145	Structural bonding - 1K silicone, electrical components		59-20
515	Gasketing - For machined, rigid metal flanges - medium cure speed	58-15	
518	Gasketing - For machined, rigid metal flanges - semiflexible	58-31	
5182/18010			58-31
5188	Gasketing - For machined, rigid metal flanges - highly flexible		58-31
5203	Gasketing - For machined, rigid metal flanges - easy disassembly	28-15	
5205	Gasketing - For machined, rigid metal flanges - semi flexible	28-15	
5206		28-15	
5208	Gasketing - For machined, rigid metal flanges - semi flexible	28-15	
5366	Structural bonding - 1K silicone, general purpose	59-20 Trasp.	
5367	Structural bonding - 1K silicone, general purpose		59-30
5368	Structural bonding - 1K silicone, general purpose		59-30 Black
5399	Structural bonding - 1K silicone, high temperature resistance	59-30	
542	Thread Sealant - For fine metal threaded fittings, espacially hydraulic pipes	53-14	
543			53-14

549			58-14
554		85-55	
565			18-10
566		14-36	
567			
569			14-36
5699	Gasketing - For flexible flanges, machined or casted surfaces, metal or plastic, excellent in water/dlvcol	59-20 G	
570	Thread Sealant - For metal, low strength, very slow curing threadsealant		18-10/26-18
572	Thread Sealant - For metal, slow cure thread sealant	18-10	
573	Gasketing - For machined, rigid metal flanges - slow curing	28-10	
574	Gasketing - For machined, rigid metal flanges - general purpose	58-14	
576		15-36	
577	Thread Sealant - Medium strength pipe sealant for metal threads.	58-11	
582			56-03
586	Thread Sealant - For metal, high strength, excellent on brass sealant	86-55	
5900	Gasketing - Thixotropic paste, black, excellent in engine oils	59-20 Nero	
5910	Gasketing - For flexible flanges, machined or casted surfaces, metal or plastic	59-20 Nero	
5920	Gasketing - For flexible flanges, machined or casted surfaces, high temperature resistant		59-30
5940			59-30 N
595			59-20 Trasp.
596			59-30
5970	Structural bonding - 1K silicone, oil resistance		59-20 N
598			59-20 N
5999			59-20 G
601	Retaining - High strength, low viscosity, small gaps retainer	82-21	
603	Retaining - High strength, oil tolerant retainer	82-33	
609	Retaining: Low viscosity, rapid-curing retaining compound to augment press fits.		82-33
620	Retaining - High strength, high temperature resistance retainer	86-86	
638	Retaining - High strength, general purpose retainer	85-21	
638 UV			85-61
640	Retaining - High strength, good temperature resistance, slow curing retainer	83-31	
641	Retaining - Medium strength, if disassembly is required retainer	53-11	
648	Retaining - High strength, good temperature resistance retainer	83-21	
648 AV		83-03	
648 BV		82-01	
649	Retaining - High strength, no acrylic acid retainer	83-21	
660	Retaining - High strength, gap fill for repair retainer	89-51	
661	Retaining - High strength, low viscosity, also UV-curing retainer	83-61	
662	Retaining - High strength, medium viscosity, also UV-curing retainer	85-61	
675	Retaining - High strength, slow curing retainer	82-13	
680			83-80
7025		Activator 9	
7031		Cleaner 10	
7063	Cleaning - General purpose parts cleaner and degreaser prior to bonding, which leaves no residue (solvent based)	Cleaner 10	
7090		Activator 18	
7091	Surface Treatment - Activator, solvent free		ATT.18
7113		Activator 9	
7386	Surface Treatment - Activator Solvent based	Activator 20	
7388	Surface Treatment - Activator Solvent based sold as kit with Loctite® 330	Activator 20	
7452	Surface Treatment - Accelerate, best cosmetic appearance		Att.9
7457		Activator 9	
7458		Activator 9	
7471	Surface Treatment - Activator, solvent based		Att.11

7649	Surface Treatment - Activator, solvent based	Activator 11	
768			CR1
770	Surface Treatment - Improve adhesion, plastic primer	Activator 7	
7701	Surface Treatment - Improve adhesion, for medical applications		Attiv.7
8104	Lubrication - Greases, Plastic part application	Activator 9	
9450		32-43	
9460			3636
9461			3638
9466	Structural bonding - 2K Epoxy, toughened multiple purpose bonder, high bonding strength for all substrates		36+IND.10
9480			4147
9484			36-15
9489			34-15
9492			4401
9514			4500/4690
962			86-72
971		55-37	
Terostat 9120			59-40 G
Terostat 931			59-42
Terostat MS 939 black	Medium Modulus-elastic, 1-component adhesive sealant based on modified silane polymer		59-40 G
18011		30-27 UV	
20166			59-20 G
59575			59-40 TRASP.
59630			59-30
121078			86-21
128455			82-01
128500		UVAE 3338
